

Audit Services for Manufacturing Best Practices

From factories and warehouses to distribution centers and stores, companies with global reach and worldwide brands rely on STR-Registrar, LLC (STR-R) for their audit needs. With extensive knowledge of regulatory requirements, our audit specialists' work within applicable code-of-conduct and governing frameworks to provide essential information that enables brand managers, compliance officers and quality assurance specialists to make informed decisions directly impacting brand credibility and product marketability.

Current Good Manufacturing Practices (cGMP) – Conducted for regulated industries including food and food packaging, dietary supplements, pharmaceuticals, medical devices, and cosmetics, evaluates quality through the assessment of best practices relating to methods, equipment, facilities, and product control.

Factory Quality and Capability (General GMP) — Conducted for non-regulated industries such as toy, toy premiums, textiles, personal care, household chemicals, and general consumer merchandise, assesses product safety and reliability through early detection of manufacturing issues that could result in product defects and production delays.

Safe Quality Food (SQF) — Conducted for food suppliers to the retail and service industries, grants certification for food items that meet specific SQF program requirements mandated by the Global Food Safety Initiative (GFSI) recognized food safety and product quality management certification system.

Hazard Analysis Critical Control Points (HACCP) — Conducted for the food product and nutritional supplement industries, inspects unit operation, product and documentation in plants, distribution centers, warehouses, retail stores, and food service establishments to ensure the HACCP plan is meeting all obligations.

Social Compliance — Conducted from farms to factories, evaluates the working conditions of your labor force, environmental health and safety, and legal and ethical concerns to verify regulatory compliance and demonstrate client commitment to responsible sourcing practices.

STR-R is accredited to audit your manufacturing processes and products for compliance to international, national and regional regulations.
